Aligning Collective Impact Initiatives

Communities can suffer from too many initiatives, creating overlap, inefficiency, and frustration.

BY MERITA IRBY & PATRICK BOYLE

Northern Kentucky was a hotbed of collective impact initiatives long before anyone called them “collective impact.” For decades, the region’s government and civic leaders have tackled thorny social issues through partnerships to create a vision for the region’s future and to implement plans to fulfill that vision. “We were doing collective impact,” says the vice president of one such effort. “We just didn’t have those words.”

When it came to education initiatives, however, Northern Kentucky had too much of a good thing. Initiatives were created to foster collaboration among educators, among educators and businesses, and among educators, businesses, government, and civic organizations. Countless other organizations had a hand in education as part of their missions to help children and families. “You would sit in these meetings and hear lots of good ideas,” recalls Patricia Nagelkirk, director of communications for the Forum for Youth Investment. “But there was no coordinator or game plan to carry them out.”

As collective impact initiatives blossom around the country, Northern Kentucky provides a case study in handling a dilemma that can spring from that growth. When multiple initiatives develop overlapping missions, members, and audiences, how can you reduce competition and increase impact?

Today, Northern Kentucky’s education initiatives are aligned through a backbone organization that aims to improve all youth supports, from birth to career. To achieve that goal, local leaders grappled with issues like: Which existing groups can deliver backbone supports? How is backbone support funded? What do the initiatives do about areas where their work overlaps? Do any existing initiatives need to fold? Finding the answers took two years and a lot of analysis, negotiation, and, as Northern Kentucky leaders note, some frank and “uncomfortable” conversations. (See “Keys to Successful Alignment” below.)

**MOTIVATION TO ALIGN**

The dilemma was born of abundance. Through the 1990s and early 2000s, several partnerships and initiatives were launched to improve educational services in Northern Kentucky (an area defined as anywhere from four to nine counties south of the Ohio border). The Council of Partners in Education sought to improve economic and social conditions, had the presence of dozens of jurisdictions, and was primarily facilitated by neutral organizations.

In 2008, Vision 2015 launched a series of discussions with education stakeholders about aligning their efforts under one umbrella. (Vision 2015 harbored no desire to be the umbrella; its agenda extended beyond education.) Then in 2009, the United Way of Greater Cincinnati (which covers Northern Kentucky) signed on with our national nonprofit organization, the Forum for Youth Investment, to facilitate the implementation of the Regional Plan for Youth Investment. Kara Williams, Vision 2015’s vice president of communication and strategic initiative, is co-founder and chief operating officer of the Forum for Youth Investment. She is a researcher, author, and former classroom teacher. Patrick Boyle is senior director of communications for the Forum for Youth Investment. He is an author and former editor of Youth Today.

Education Alliance, a venture of the Chamber of Commerce, worked to increase cooperation between schools and businesses. Vision 2015, which fostered cross-sector collaboration to improve economic and social conditions, had an Education Implementation Team. Some people were involved in all of these efforts and ran into each other at every meeting. “In any given week,” recalls educator Polly Lusk Page, “you could go to three meetings and hear the same report three times.”

The initiatives competed for resources and attention from the same audiences. Although they worked together to varying degrees, they had no overarching strategy, and efforts to collaborate were complicated by a challenge that’s typical in rural and suburban areas: the presence of dozens of jurisdictions covering a large region.

Lusk Page recalls the frustration expressed by Vision 2015’s leaders: “We have too much going on. We have a lot of duplication of effort, and the business community is saying, ‘Too many people are coming to us with too many asks.’” Vision 2015 posited an idea: “What would it look like if we realigned?” Finding the answer took two years of research and discussions. Because several organizations felt qualified to lead the new structure, these processes were facilitated primarily by neutral organizations.

Two processes somewhat overlapped. In 2008, Vision 2015 launched a series of discussions with education stakeholders about aligning their efforts under one umbrella. (Vision 2015 harbored no desire to be the umbrella; its agenda extended beyond education.) Then in 2009, the United Way of Greater Cincinnati (which covers Northern Kentucky) signed on with our national nonprofit organization, the Forum for Youth Investment, to facilitate the implementation of the Regional Plan for Youth Investment. Kara Williams, Vision 2015’s vice president of communication and strategic initiative, is co-founder and chief operating officer of the Forum for Youth Investment. **GUIDELINE**

<table>
<thead>
<tr>
<th><strong>WHY IT’S IMPORTANT</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Start with a focus on the outcomes you want to achieve</strong></td>
</tr>
<tr>
<td>Focusing on outcomes galvanizes people around goals that are harder or more complex than those they’ve tried to tackle alone, and it prevents getting stuck on existing strategies that might not be best for those outcomes.</td>
</tr>
<tr>
<td><strong>Draw a picture big enough so that existing efforts see how they can connect and why</strong></td>
</tr>
<tr>
<td>A big picture reinforces the idea that complex challenges need interconnected solutions and prevents the “edifice complex,” which assumes that solutions revolve around certain institutions, such as schools.</td>
</tr>
<tr>
<td><strong>Identify where there is more efficiency and power in working together than alone</strong></td>
</tr>
<tr>
<td>Analysis of synergies creates energy for leaders to take on issues that are too big to handle alone and to scale up solutions they didn’t know they were pursuing separately. It also prevents development of agendas that are too big or piecemeal to make a difference.</td>
</tr>
<tr>
<td><strong>Clarify the lines of communication and accountability</strong></td>
</tr>
<tr>
<td>Clarification focuses committed partners on the routinization of their relationships and prevents “task-force syndrome,” in which partners sign on to recommendations without assuming responsibility to implement them.</td>
</tr>

Even while this process settled questions, and resources among organizations facilitated 2015’s educational goals. “We funneled all of Education Implementation Team, because the ance moot; it dissolved. So too did Vision 2015's and composed of representatives from organi-

visions in two ways: to focus on specific youth outcomes and to extend beyond education. One of Ready by 21’s fundamental concepts is the “Insulated Education Pipeline,” which says communities must ensure a full array of cradle-to-career supports beyond academics, in such areas as early childhood, health, safety, social connections, and job skills. “That pipeline,” says Lusk Page, “helped people understand in a way that we never understood before that we can work on the academic pipeline all we want, but until we broaden our scope and think about these wrap-around supports that our families and youth need, this isn’t going to work.”

Building an insulated pipeline of supports meant creating and strengthening partnerships between education organizations and others that provide everything from after-school activities to job training. The umbrella question arose again: Could one group coordinate these stakeholders? The NKYEC united local education efforts, but the United Way was the lead partner in Ready by 21, which brought funding and technical assistance. The NKYEC and United Way had not worked together much, and their geographic coverage in Northern Kentucky did not exactly match.

“There were some very candid conversations in our initial meetings” about what organization should lead the broader work, Lusk Page recalls. The United Way grew convinced that the NKYEC was up to the task, but each party needed assurances about responsibilities and resources. Those were laid out in a 2010 memorandum of understanding between the United Way, NKYEC, and Vision 2015. They agreed, for the purpose of the broader work, to adopt the NKYEC’s geographic footprint (6 counties, 37 municipalities, and 18 school districts), and that Vision 2015 would pay for a part-time staff member for the NKYEC to carry out the work.

Thus the NKYEC stretched further. Its desired outcomes now include not just academic achievement but the overall well-being of young people. It advocates birth-to-career supports, adding early childhood on the younger end, for example, and workforce development for older youths. And its bylaws mandate equal seats for education, business, and community leaders (such as nonprofit service providers) on its board of directors.

Leaders of the NKYEC effort are cautious about drawing connections just yet between the collective impact strategies and population-level outcomes. Nonetheless, Lusk Page says, “the needle’s starting to move” on some indicators, such as reading levels, graduation rates, and measures of college and career readiness. More visible are the on-the-ground changes in the services and supports that young people receive, thanks largely to the work of the action teams.

Education and business groups launched initiatives to prepare more high school students for college and careers, such as increasing enrollments in dual-credit courses, mapping local career readiness resources, and training teachers to integrate 21st-century skills development in their classrooms.

More than 80 schools administered an enhanced version of the Gallup Student Poll, which measures hope, engagement, and well-being. Schools combine the findings with data about grades and attendance, using the results to steer students to school supports (such as life skills courses) and to increase after-school opportunities (such as leadership development programs).

The NKYEC, the United Way, and the Strive Partnership launched a literacy campaign with more than 70 partners.

Realignment resolved the problem that leaders set out to solve: Northern Kentucky has moved from having “no coordinator or game plan” and disparate collective impact initiatives to embracing a highly coordinated system.

The leaders of these efforts feel that they are poised to accomplish changes that they could not have imagined before. The NKYEC, for example, is working with the Forum for Youth Investment and SAS (a business analytics software and services company) to pilot a diagnostic system to link efforts to impact. The system will gather and display data from multiple sources and show how resource allocation and community supports affect outcomes for children and youths. “For the first time, we will have the power to see our impact and make adjustments,” says Lusk Page. “We’ll really know if we are making a difference.”
